

2027-2031 Strategic Plan Summary

Five-year strategic direction

Strategic Purpose

GPAF's 2027-2031 strategy links environmental resilience, productive livelihoods and enterprise growth. The approach is designed to move beyond short-term relief by building local capability, assets, markets and partnerships.

Strategic Pillars

- Climate Resilience & Environmental Protection
- Sustainable Agriculture & Food Security
- Green Entrepreneurship & MSME Development
- Youth & Women Economic Empowerment
- Research, Advocacy & Partnerships

Delivery Model

Programmes will combine community needs assessment, co-design, technical assistance, enterprise support, market linkages, partnerships and monitoring, evaluation and learning.

Indicative KPIs

- People reached and percentage of women/youth beneficiaries
- MSMEs supported, formalised or financed
- Enterprises created or strengthened
- Jobs and self-employment opportunities enabled
- Farmers adopting climate-smart practices
- Land restored / trees established and surviving
- Partnerships mobilised and policy/learning products produced

Funding Approach

GPAF seeks grants, corporate partnerships, technical assistance, research collaboration, blended finance and responsible philanthropic support aligned with measurable development outcomes.
